1 Introduction

To ensure best compatibility with version control (e.g. git), it is best to write one sentence per line and configure your editor not to hard-break lines. For citations use [1] or [1, p. 6–8]. For quotes use, for example,

“This is a proper quote.” [1, p. 6]

Sometimes, we would like to include figures. This sentence provides an example of referencing to Fig. 1.

You can of course also refer to Sec. 1 or to Sec. 1.1.

Footnotes are included, for example, here.¹
